PROFESSIONAL SUMMARY

Aspiring QA Automation Engineer transitioning from logistics and civil engineering into software testing. Built five portfolio projects covering UI automation and API testing with Playwright and TypeScript, using the Page Object Model, assertions, and positive and negative test scenarios. Experience running tests across multiple browsers and through GitHub Actions and Jenkins. Bring transferable skills in team supervision, operational coordination, and monitoring daily work activities. Seeking a first role as a Junior QA Automation Engineer, Junior Software Tester, or QA Analyst.

TECHNICAL SKILLS

Automation: Playwright, TypeScript, Node.js, Page Object Model (POM), reusable page methods, assertions
Software Testing: Functional testing, positive and negative testing, web application testing, cross-browser testing, authentication and authorization testing
API Testing: REST API testing, status code validation, JSON response validation, pagination, negative testing
Tools & CI: Git, GitHub, GitHub Actions, Jenkins (basic pipeline)

QA AUTOMATION PROJECTS

1. Airline Booking Automation | Playwright, TypeScript

- Automated functional scenarios covering flight search, flight selection, passenger details, payment, and booking confirmation.
- Applied POM, reusable page methods, and assertions, including negative scenarios for invalid or missing booking details.

GitHub: github.com/jegadeeshwaran-qa/P1-Airline-Booking-Automation

2. Banking API Automation | Playwright, TypeScript

- Validated banking API endpoints, including status codes, JSON responses, account details, balances, and pagination.
- Tested negative scenarios, such as requests with an invalid account ID.

GitHub: github.com/jegadeeshwaran-qa/P2-Banking-API-Automation

3. E-commerce Automation | Playwright, TypeScript

- Automated product search, category filters, price sorting, shopping cart, and checkout validation.
- Used POM and test data for multiple scenarios, including checkout with missing required fields.

GitHub: github.com/jegadeeshwaran-qa/P3-Ecommerce-Automation

4. Food Delivery Automation | Playwright, TypeScript

- Tested login, pizza customisation, cart totals, checkout, payment method changes, and order confirmation.
- Used page objects with positive and negative scenarios to validate key workflows and business rules.

GitHub: github.com/jegadeeshwaran-qa/P4-Food-Delivery-Automation

5. Authentication & Authorization Automation | Playwright, TypeScript, Jenkins

- Automated login, logout, and protected-page access scenarios, covering both valid and invalid cases.
- Ran the tests across Chromium, Firefox, and WebKit, and executed the suite through a Jenkins pipeline on Windows.

PROFESSIONAL EXPERIENCE

Logistics Manager | Plam Services Pte. Ltd., Singapore | Apr 2025 – Present

- Coordinate baggage sorting activities, supervise team members, and monitor daily operations.
- Support workflow coordination and the timely completion of assigned tasks.

Site Engineer | Construction Industry, India | 2017 – 2025

- Coordinated daily site activities and monitored work progress.
- Supported project schedules and completion targets.

EDUCATION

Bachelor of Engineering (B.E.), Civil Engineering
Anna University, Tamil Nadu, India | 2013 – 2017

ACHIEVEMENTS

Award winner in state-level and inter-college quiz, paper presentation, and PowerPoint presentation competitions.
